- Present Post: Full-Stack Developer – Nairobi, Kenya

## PROFESSIONAL SUMMARY

Full-Stack Developer with a strong foundation in IT support and over 10 years of experience in technology environments. Skilled in designing, developing, and maintaining web applications using modern technologies including JavaScript, Node.js, Express.js, SQL, and PostgreSQL.

Combines hands-on development expertise with deep knowledge of system administration, troubleshooting, and cloud-based environments. Passionate about building scalable web applications, improving system performance, and delivering user-focused solutions.

Experienced in Agile environments and collaborative team development.

## KEY SKILLS AND COMPETENCIES ACQUIRED

- Full-Stack Development & Project Delivery: Ability to design, develop, and deliver full-stack applications from concept to deployment, managing timelines, requirements, and iterative improvements using Agile practices.
- Problem Solving & Analytical Thinking: Strong ability to analyze complex technical challenges, debug application issues, identify root causes, and implement efficient, scalable solutions across frontend and backend systems.
- Software Development & Technical Expertise: Hands-on experience building web applications using JavaScript, Node.js, Express.js, and SQL/PostgreSQL, with solid understanding of APIs, system architecture, and development tools. Skilled in scripting, automation, and optimizing application performance.
- Application Performance & Optimization: Capable of improving system efficiency through code optimization, debugging, and performance tuning across the full technology stack.
- Communication Skills: Strong communication skills with the ability to clearly explain technical concepts, collaborate with cross-functional teams, and contribute effectively to team-based development environments.
- Time Management: Effective prioritization and time management skills, ensuring timely resolution of incidents and successful delivery of projects within deadlines.

## WORK EXPERIENCE

Desktop Support Technician  
*Jacuzzi Group – USA (Remote)*  
*August 2024 – Feb 2026*

### Duties and Responsibilities

- Microsoft Intune Management – Performed remote device actions including wipe, lock, reset, and troubleshooting for lost or compromised devices.
- Software Support Troubleshooting and maintenance e.g., IBM System
- AWS Workspace – Provided end-to-end support for AWS WorkSpaces, delivering secure virtual desktop environments for remote and hybrid users.

- Security – Collaborated with security teams to enhance endpoint protection using Microsoft Defender and Intune policies.
- Managed and resolved IT support tickets using Jira ticketing system, ensuring timely issue and clear a backlog of 329 tickets.
- Documentation – Created and maintained consistent, well-structured Standard Operating Procedures (SOPs) to standardize IT processes and workflows.
- Ticket Support – Maintained clear and accurate ticket updates, ensuring transparent communication with users until resolution.

#### IT Support Engineer

*Association of Jehovah's Witnesses in East Africa Branch - Nairobi, Kenya*

*July 2016 – June 2024*

#### Duties and Responsibilities

- Infrastructure Support: Assist in server setup (HP servers), software deployment, system upgrades, and on-premises technical support
- Security & Access Management: Implement user authentication, manage permissions, and follow security best practices for endpoint and account protection
- IT Asset & Lifecycle Management: Track IT inventory, manage asset lifecycle, and support procurement processes
- Preventive Maintenance: Perform routine system checks, patching, updates, and maintenance of network and technical equipment
- Vendor & ISP Coordination: Work with ISPs and third-party vendors to troubleshoot issues and maintain service continuity

#### SKILLS

##### Frontend Development

- o HTML5, CSS3, JavaScript (ES6+)
- o Responsive Web Design
- o DOM Manipulation

##### Backend Development

- o Node.js, Express.js
- o RESTful API Development
- o Server-side logic and routing

##### Databases

- o SQL, PostgreSQL
- o Database design and query optimization

##### Version Control & Tools

- o Git, GitHub
- o Jira (Agile sprint planning and backlog management)

##### DevOps & Cloud Concepts

- o Basic CI/CD workflows
- o Deployment concepts and environment configuration

##### Systems & IT Foundations

- o Linux, Windows, macOS
- o Microsoft 365, Active Directory
- o Networking fundamentals (DNS, TCP/IP)

#### WORK EXPERIENCE

As an IT professional I constantly learn new skills to stay current with emerging technologies. Throughout the years, I have stayed up to speed on the most recent improvements and have rapidly acquired the knowledge of how to use them in a way that best suits my employer's requirements. I've detailed my ten years of learning here;

- Delivered *user training on Microsoft 365, Windows, and Linux environments*, both remotely and on-site.
- Managed and resolved *cybersecurity incidents*, while providing targeted user awareness training to strengthen security posture.
- Provided *web security support*, identifying vulnerabilities and mitigating risks.
- Delivered *Tier 1 and Tier 2 technical support*, resolving user issues efficiently and escalating where necessary.
- Supported and maintained *multi-platform environments*, including Windows, macOS, iOS, Android, and Ubuntu systems.
- Utilized *Git and GitLab* for version control and automation in system implementations.
- Deployed and supported *on-premises IT infrastructure*, including Microsoft RDS, DFS file servers, print services, and SCCM for application deployment.

- Performed *remote troubleshooting* using diagnostic tools to resolve technical issues quickly and effectively.
- Provided *end-user support for hardware and software*, diagnosing and resolving faults across desktops, laptops, and mobile devices.
- Administered and supported *Microsoft 365 services* including SharePoint, Teams, OneDrive, and Office applications.
- Utilized *remote access tools* to securely connect to user systems for troubleshooting and support.
- Worked remotely with other technicians in Europe, Africa and USA to resolve technical issues.

Passionate about leveraging emerging technologies, leading effective problem resolution, and ensuring high-quality service delivery, I take pride in driving client satisfaction and continuous improvement across IT support operations.

## KEY ACHIEVEMENTS

- **Backlog Reduction:** Led a team to reduce the IT support backlog by 60% within one quarter (3 months) through improved prioritization and follow-up.
- **System Reliability:** Enhanced system uptime and performance by implementing proactive monitoring and preventive maintenance strategies, reducing downtime incidents.
- **Cost Optimization:** Reduced IT operational costs by optimizing vendor contracts and improving resource allocation across infrastructure and support services.

## HOBBIES

Volunteering, Reading, Swimming, Bike riding and Travelling

## LANGUAGES

Fluent in English and Swahili

## EDUCATION

- Full-Stack Engineering – Codecademy, Dec 2023 - April 2026
- Cisco Network Support and Security Certification - Cisco April 2026
- Learn PowerShell Course - Codecademy, July 2024
- CompTIA A+ (Certification) – CompTIA 1101 & 1102 Study Guides, April - May 2024
- [Verify at: <http://verify.CompTIA.org> - Code: 1VV53BGTGB14QKWX]
- Diploma in Technology (Electrical and Electronics Engineering) – Technical University of Kenya, Nairobi; 2015 - 2018

## CERTIFICATION

I, the undersigned, certify that to the best of my knowledge and belief, these bio data correctly describe me, my qualifications and my experience.

Signature: *Maria Musyoka*

Date: 4th April, 2026
